EMBROIDERY

HEAT TRANSFERS

## ESSENTIAL PRODUCT INFORMATION

---

Due to the nature of acrylic, any decoration process where heat is applied for curing is not recommended. Please consult with your decorator or material supplier.

Due to the nature of nylon, special care must be taken throughout the decoration process when heat is applied for curing. Please consult with your decorator or material supplier.

## TIPS FROM OUR EXPERTS BY DECORATION TECHNIQUE

---

### EMBROIDERY

Embroidery is the art of embellishing a piece of apparel with a needle and thread or yarn creating stunning visual representations of various types of art. This is achieved by converting logos in a digitizing software and using various stitch patterns, angles, density and stitch types to create depth, movement and detail. Thread can be made from many materials. The most commonly used threads are polyester and rayon. There are also options such as metallic, cotton, nylon, silk and even Nomex thread for fire resistance. Embroidery has a very high-perceived value and is popular for use on most apparel, bags, hats, luggage, blankets and more!

### HEAT TRANSFERS

A graphic, name and or number applied to a textile with a heat press. Great for quantities of any size, sports name and numbering, fashion, performance wear, print on demand programs and on-site decorating events.

**Heat transfers with low cure adhesive and bleed blockers are required for this product.**

Please consult with your decorator, distributor or supplier for further information. For any questions, please email [orders@printwear.io](mailto:orders@printwear.io) | Visit [Printwear.io](http://Printwear.io)
