TIPS FROM OUR EXPERTS BY DECORATION TECHNIQUE

EMBROIDERY

Embroidery is the art of embellishing a piece of apparel with a needle and thread or yarn creating stunning visual representations of various types of art. This is achieved by converting logos in a digitizing software and using various stitch patterns, angles, density and stitch types to create depth, movement and detail. Thread can be made from many materials. The most commonly used threads are polyester and rayon. There are also options such as metallic, cotton, nylon, silk and even Nomex thread for fire resistance. Embroidery has a very high-perceived value and is popular for use on most apparel, bags, hats, luggage, blankets and more!

Resealing the back of embroidery on this product to retain waterproof and water-resistant properties is recommended. Water Proof/Coated Fabric with bonded barrier- 65/9 or 70/10 coated Sharp Point

SCREEN PRINTING

An imprinting method in which the image is transferred to the fabric. Ink is squeegeed through a stenciled screen stretched over a frame and then cured in a dryer.

Bonding catalysts may be required for stain release, water resistant/waterproof coated and nylon fabrics. For best results with non-bonded linings, specialty clamps may be required.

HEAT TRANSFERS

A graphic, name and or number applied to a textile with a heat press. Great for quantities of any size, sports name and numbering, fashion, performance wear, print on demand programs and on-site decorating events.

Heat transfers with an aggressive adhesive are required for stain release, water resistant/waterproof coated and nylon fabrics. Consult with your transfer supplier for recommendations.
