### ESSENTIAL PRODUCT INFORMATION

---

### TIPS FROM OUR EXPERTS BY DECORATION TECHNIQUE

---

#### EMBROIDERY

Embroidery is the art of embellishing a piece of apparel with a needle and thread or yarn creating stunning visual representations of various types of art. This is achieved by converting logos in a digitizing software and using various stitch patterns, angles, density and stitch types to create depth, movement and detail. Thread can be made from many materials. The most commonly used threads are polyester and rayon. There are also options such as metallic, cotton, nylon, silk and even Nomex thread for fire resistance. Embroidery has a very high-perceived value and is popular for use on most apparel, bags, hats, luggage, blankets and more!

**In order to maintain waterproof integrity, please consult with your decorator, equipment, and consumable supplier for best practices.**

**Water Proof/Coated Fabric with bonded barrier- 65/9 or 70/10 coated Sharp Point**

#### SCREEN PRINTING

An imprinting method in which the image is transferred to the fabric. Ink is squeegeed through a stenciled screen stretched over a frame and then cured in a dryer.

**Low-cure poly inks are required. Grey or black bleed blockers may be necessary.**

**For best results with non-bonded linings, specialty clamps may be required.**

#### HEAT TRANSFERS

A graphic, name and or number applied to a textile with a heat press. Great for quantities of any size, sports name and numbering, fashion, performance wear, print on demand programs and on-site decorating events.

**Heat transfers with low cure adhesive and bleed blockers are required for this product.**

**Avoid hot stacking when decorating 100% polyester, blends, and pigment dye fabrics.**

**Please consult with your decorator, distributor or supplier for further information. For any questions, please email [orders@printwear.io](mailto:orders@printwear.io) | Visit [Printwear.io](http://Printwear.io)**
