#### **DECORATION TECHNIQUES**

**EMBROIDERY** 

**SCREEN PRINTING** 

**HEAT TRANSFERS** 

LASER ETCHING

#### **ESSENTIAL PRODUCT INFORMATION**

Due to the nature of 100% polyester fabrics, special care must be taken throughout the decoration process when heat is applied for curing. Please consult with your decorator or material supplier.

Due to the nature of water proof coatings, special care must be taken throughout the decoration process. An ink catalyst additive or special adhesive heat transfer is required. Please consult with your decorator or material supplier.

#### TIPS FROM OUR EXPERTS BY DECORATION TECHNIQUE

#### **EMBROIDERY**

Embroidery is the art of embellishing a piece of apparel with a needle and thread or yarn creating stunning visual representations of various types of art. This is achieved by converting logos in a digitizing software and using various stitch patterns, angles, density and stitch types to create depth, movement and detail. Thread can be made from many materials. The most commonly used threads are polyester and rayon. There are also options such as metallic, cotton, nylon, silk and even Nomex thread for fire resistance. Embroidery has a very high-perceived value and is popular for use on most apparel, bags, hats, luggage, blankets and more!

In order to maintain waterproof integrity, please consult with your decorator, equipment, and consumable supplier for best practices.

Water Proof/Coated Fabric with bonded barrier- 65/9 or 70/10 coated Sharp Point.

Resealing the back of embroidery on this product to retain waterproof and water-resistant properties is recommended.

For better results, Magnetic or Clamp Frames may be required for better stability and max decoration range.

## **DECORATION SPEC SHEET**

### OE750 OGIO® Impact Jacket

#### **SCREEN PRINTING**

An imprinting method in which the image is transferred to the fabric. Ink is squeegeed through a stenciled screen stretched over a frame and then cured in a dryer.

Low-cure poly inks are required. Grey or black bleed blockers may be necessary. Bonding catalysts may be required for stain release, water resistant/ waterproof coated and nylon fabrics.

For best results with non-bonded linings, specialty clamps may be required.

#### **HEAT TRANSFERS**

A graphic, name and or number applied to a textile with a heat press. Great for quantities of any size, sports name and numbering, fashion, performance wear, print on demand programs and on-site decorating events.

Heat transfers with an aggressive adhesive are required for stain release, water resistant/waterproof coated and nylon fabrics. Consult with your transfer supplier for recommendations.

Heat transfers with low cure adhesive and bleed blockers are required for this product.

#### LASER ETCHING

Laser etching is a decorating process that burns a pattern into the top layer of fabric, giving it a subtle tone-on-tone appearance. The image the etching creates has an upscale look that is usually the same color but several shades darker than the original fabric's color. It works well with both big or small logos.
